

Benefits of **SEARCH**:

For Paramedics

- From basic demographics, the system will search for patients automatically.
- Problems, Medications, Allergies, Encounters, and POLST are provided to the ambulance from the HIO.
- Data entry is reduced as HIO data is automatically loaded into ePCR.
- The choice of destination hospital is influenced by previous encounters.

For Patients

- Improved chance that patient will be taken to “their” ED.
- Clear to patient that the community is looking out for their best interests.
